E-commerce Operations & Business Analytics professional with 5.6 years at Amazon managing Tier-1 vendor catalog operations (Apple, Samsung, Lakmé) across international marketplaces. Certified L4 Business-Analyst-ready by Amazon's BA Academy for independently delivering an end-to-end analytics solution (ETL, SQL, QuickSight), with a track record of self-driven automation and BRD authorship delivering measurable HC savings. Consistently rated Meets/Exceeds High Bar with recognized strengths in Ownership, Customer Obsession, and Delivering Results.

PROFESSIONAL EXPERIENCE

Catalog Specialist I ML — Amazon, Delhi *Jun 2026 – Sep 2026*

- Faced with a high-volume caseload for 100+ Tier-1 Selling Partners across the Germany marketplace, resolved ~32 email cases/day at a 15-minute average handling time (AHT) — meeting policy compliance and SLA targets.
- When recurring Selling Partner issues surfaced, performed root cause analysis and partnered cross-functionally to resolve high-priority escalations within SLA, while consistently meeting Quality, Productivity, and AHT targets.

Senior Catalog Associate — Amazon, Delhi *Dec 2023 – Jun 2026*

- **Authored a Business Requirements Document (BRD)** for a self-service "Performance Portal" — defined problem statement, current-state process, and PRR/task-level metric logic — projected to eliminate ~10 min/associate/interval of manual reporting and an estimated 2 HC savings across EU3, pitched directly to Retail/Central leadership.
- **Drove a Python-based automation** to replace a fully manual node-validation process across 10 EU marketplaces; scoped, one-pagered, and got leadership sign-off, then partnered with the tech team to build and test it. Processed ~10 lakh ASINs/month, saving ~301 hours/month (~1.71 HC impact).
- Managed Tier-1 vendor accounts (Apple, Samsung, Lakmé), driving 35% GMS growth and reducing catalog defects by 60% through structured QA and process improvements.
- Became an RBS-accredited trainer (30+ associates onboarded across marketplaces) and received 10+ stakeholder shout-outs (2022–2025) across Germany, Canada, and EU vendor teams for Ownership and Customer Obsession — including resolving a Sony bestseller ASIN buybox issue unresolved for a year.

Catalog Associate — Amazon, Bengaluru *Feb 2021 – Nov 2023*

- Managed premium product catalogs for Tier-1 vendors across international marketplaces, ensuring listing accuracy and content quality; streamlined recurring reports using Excel macros, reducing manual reporting effort.
- Delivered a Quality Improvement session on Images & troubleshooting for the EU3 RBS team and, as POC for Image OU uploads, fixed an outdated 360° image SOP across EU8 marketplaces — unblocking ~220 pending cases.
- Mentored and trained 7+ new hires (incl. 3 from UK MP); resolved 70+ high-ageing/OOSLA cases in one week (Q1 2023), improving TP90 — consistently ranked on the weekly Wall of Fame post-probation.

BUSINESS ANALYTICS PROJECT

AU Theia Availability Analytics Dashboard — Amazon BA Academy (Elevate) *Dec 2025 – Feb 2026*

- Independently translated a fragmented, manual monitoring process (426+ vendor codes) into an automated solution — Cradle ETL, 12 source tables, SQL (CTEs/window functions), and a 13-visual QuickSight dashboard.
- Improved Accuracy from 88.16% to 89.02% and Coverage from 85.53% to 86.61% (~0.7 HC saved); pushed back on inaccurate source data — rated "L4 BA Ready" (Inclined) by an independent two-reviewer panel.
